Flexible tank for a large liquid reserve with instant access

Description

The self-rising flexible tank is a flexible, lightweight solution for obtaining a large liquid reserve with instant access from above.

It is suitable for a wide range of applications, including

- o Rainwater storage in case of fire
- o Mobile tank for drainage
- o Drinking water storage
- o Temporary storage of various liquids

The self-rising flexible tank offers a number of advantages:

- Quick, reliable installation: ready to use.
- Optimum tightness thanks to HF (high-frequency) welding.
- High mechanical strength for use almost anywhere on a straight surface.
- Liquid-tight.
- Easy to maintain.
- Long-lasting and sturdy.
- Footprint: 5.4m diameter.
- 150mm diameter foam flotation tube
- Fabric PES hte 1100 dtex coated 2 sides PVC 900gr/m².
- Floor mat/bag with waterproof strap
- Wall bushing with 2" 1/4 turn valve and Sym 65 aluminium AV half-fitting

The model is adaptable.

Caractéristiques

- Weight : 28 kg
- Height : 1.20 m
- Dimensions pliée : 80 x 80 x 60 cm
