5000 L Open Flexible PVC Tank with SYM65 Fitting - Water and Liquid Storage Bladder Tank

Description

The 5000 L open flexible PVC tank with SYM65 fitting is a portable, self-erecting liquid storage solution designed for firefighting water reserves, emergency response, and temporary liquid storage. Its open-top design provides instant access to the stored liquid, making it highly practical for operational use. Designed for demanding environments, it offers a reliable and flexible solution for on-site water or liquid storage.

Main applications

- Firefighting water reserve and emergency response
- Rainwater storage
- Mobile drainage operations tank
- Potable water storage (depending on configuration)
- Temporary storage of various liquids

Technical specifications

- Capacity: 5000 litres
- Fitting: SYM65 aluminum coupling with locking system
- Wall penetration: 2" quarter-turn valve
- Material: High-tenacity PES fabric 1100 dtex, double-sided PVC coating 900 g/m²
- Welding: High-frequency (HF) welded seams for optimal sealing
- Ground diameter: 5.4 m
- Height: 1.20 m
- Weight: 28 kg
- Folded dimensions: 80 x 80 x 60 cm
- Floating collar: 150 mm foam diameter

- Ground sheet: integrated straps, non-detachable

Robust design and rapid deployment

Thanks to its self-erecting structure, the tank can be deployed quickly without complex installation. It offers excellent stability on flat surfaces and high mechanical resistance for reliable field use. The heavy-duty PVC-coated fabric combined with HF welding ensures excellent waterproofing and long-term durability, even under intensive conditions.

Key benefits

- Fast deployment and immediate use
- Lightweight and highly portable
- High mechanical and chemical resistance
- Reinforced waterproofing with HF welded seams
- Compact storage when folded
- Ideal for firefighting water reserves and emergency operations

The 5000 L open flexible PVC tank with SYM65 fitting is a reliable, efficient, and practical solution for liquid storage in demanding operational environments.

Caractéristiques

- Weight : 28 kg
- Height : 1.20 m
- Dimensions pliée : 80 x 80 x 60 cm
