

TRIAD LOCK CARABINER

<https://www.securhit.com/en/carabiners-and-connectors/77-mousqueton-triad-lock.html>

Semi-round aluminium carabiner Triad Lock

Description

Semi-circular aluminium alloy carabiner designed to provide 16 kN breaking load in all directions. It offers an exceptional resistance of 25 kN when loaded on three points and is therefore perfect for connecting fall arrest devices to the double "A/2" sternal attachment points of full body harnesses. Keylock closure prevents accidental snagging. Locking by screw ferrule.

Caractéristiques

- Dimensions : 103 x 73 mm
- Weight : 84 g
- Material : Alliage d'aluminium
