

PANORAMA NOVA MASK 5-POINT STRAP

<https://www.securhit.com/en/respiratory-protection/773-masque-panorama-nova-bride-5-points.html>

Respiratory mask Panorama Nova

Description

When combined with the right filters, air-supplied respirators and self-contained breathing apparatus, the Panorama Nova respirator is a safe and reliable system.

The Panorama Nova mask body is made from EPDM or silicone, which is particularly gentle on the skin. This material remains extremely flexible at both high and low temperatures. Its double sealing frame and three sealing lips offer a secure, comfortable fit for most face shapes. Thanks to its universal sizing system, logistics and storage are greatly simplified.

The distortion-free visor is made from impact-resistant polycarbonate as an option, or chemical-resistant Triplex glass. The 180° viewing angle provides an unobstructed field of vision. The intelligent ventilation system ensures a fog-free visor.

The wide range of accessories makes Panorama Nova a versatile piece of equipment. The Panorama Nova's high-quality materials are easy to clean and maintain. Its high-quality construction guarantees a long service life and long-term savings.
