Breathable compressed air cylinder

Description

6l 300b lightweight steel compressed air breathing cylinder

Complies with EN 144-1 and 2 and Directives PPE (89/686) and PED (97/23)

- working pressure 300b
- lightweight steel cylinder painted grey
- unlimited service life
- valve compliant with EN 144-1 and 2 (straight valve without EFV as standard)
- autonomy: approx. 40 min (according to EN 137)
- maintenance regime: periodic inspection 40 months, requalification 10 years.

The cylinder is specially designed to minimise the weight carried by the user during dangerous fire-fighting operations. As a result, users are less tired and more agile.

Caractéristiques

- Weight : 7 kg
- Diameter : 139.5 mm
- Height : 510 mm
