Versatile rope tool

### Description

The Piu 2.0 is a versatile tool that can be used with ropes of any diameter. It has a V-shaped groove for better braking control and, thanks to a second carabiner hole, can be used to release and descend from one to two seconds without any difficulty with the ropes under tension.

Features :

- Ideal for belaying lead climbers
- Diagonal rope to prevent chafing and jamming.

### Caractéristiques

- Weight : 80 g
- Norme : EN 15151-2
- Diamètre de la corde minimum : Double 7.6 - 9 mm
