PETZL ABSORBICA-Y double lanyard with integrated energy absorber, with or without MGO connectors. Ideal for use on vertical structures or horizontal lifelines.

Description

When working at height or climbing for pleasure, safe equipment is a must. PETZL's ABSORBICA-Y double lanyard ensures your protection when progressing on a vertical structure or horizontal lifeline.

- Progressive tearing of the energy-absorbing webbing reduces the impact on the user.
- Suitable for people weighing between 60 and 140 kilograms
- Compact size, thanks to the energy absorber's compact design.
- Wear protection for the absorber, thanks to the resistant fabric pouch and simplified opening system

PETZL's ABSORBICA-Y double lanyard can be attached to the harness in two ways:

- With a carabiner held in place by a STRING accessory, supplied with the lanyard, or with a MICRO SWIVEL to prevent kinking (in the event of numerous connections/disconnections).
- With an openable RING OPEN ring or SWIVEL OPEN swivel if you want a quasi-permanent connection

Model L012CB00 (European version)
The lanyard comes with two MGO wide-opening connectors at the end of the lanyard for connection to a metal structure and an OK TRIACT-LOCK connector for attachment to a harness.

Model L012BB00 (international version)
The lanyard features two MGO wide-opening connectors at the end of the lanyard for connection to a metal structure and a Bm'D connector for attachment to a harness.

Lanyard length with connectors: 100 cm
