

PILLAR STEEL CARABINER

<https://www.securhit.com/en/carabiners-and-connectors/79-mousqueton-pillar-steel.html>

Carabiner designed for lowering, work at height and rescue operations

Description

Oval-shaped carabiner in zinc-plated steel with straight gate, designed for lowering, working at height, industry safety, and rescue operations.

It is a very strong carabiner, it lasts in time and has a high breaking strength.

It is ideal as an abseiling carabiner, for work at height, rescue operations and hoisting, with its zinc-coated finish that prevents the formation of rust in moist environments and its catch-free locking system that prevents accidental snagging when clipping and unclipping.

Caractéristiques

- Dimensions : 110 x 61 mm
- Weight : 163 g
