

PETZL CLUB 10 MM ROPE

https://www.securhit.com/en/ropes-and-cords/797-1450-corde-petzl-club-10-mm.html#/1266-modele_r39-200_m_orange

PETZL CLUB semi-static rope for caving and canyoning. A flexible, durable 10 mm diameter rope with a good grip.

Description

A rope for a variety of uses, both durable and ultra-strong? In activities such as canyoning and caving, these advantages are highly sought-after. PETZL's CLUB rope meets all these criteria, so you can enjoy your outings in complete safety.

Flexible equipment with a good grip:

- EverFlex heat treatment for excellent rope homogeneity
- Efficient grip thanks to 10 mm diameter
- A rope for all levels with assured control of the descent

Durability:

- Designed for maximum strength
- A length with built-in margin to compensate for rope shrinkage when first used

A ready-to-use rope:

- Specific ClimbReady coiling to preserve fibers and limit the risk of twisting
- UltraSonic Finish to secure the core and sheath at the ends (increasing the rope's durability)
- Easy identification of the middle of the rope with Middle Mark

PETZL's CLUB rope is ideal for caving, canyoning and setting up fixed ropes. It is available in 4 lengths: 40, 60, 70 and 200 meters, and in two colors, white or orange (depending on model).

Breaking strength: 25 kN.

Strength with figure-of-eight knot : 15 kN.

Impact force (factor 0.3): 5.5 kN.

Number of falls factor 1: 5.

Construction: 32 spindles.

Sheath percentage: 46%.

Static elongation: 3.1%.
