

ALUTHERM GLOVES 30 CM / PAIR

<https://www.securhit.com/en/hand-protection/824-gants-alutherm-30-cm-la-paire.html>

Pair of gloves with a contact layer of Alutherm® glass fabric

Description

5-finger glove with internal thermal insulation via a flame-retardant wool lining and designed with a Kevlar® thread assembly.

The gloves are made from Alutherm® glass fabric with an inner jersey lining.

Limited contact with parts up to 600°C.

The duration of insulation depends on the temperature of the object.

The CE mark affixed to these items signifies compliance with the essential requirements of the European Directive on Personal Protective Equipment, based on standard ISO 13688.
