Wetting Proportioner Injector 230 L/min with DSP40 Fittings - BYPP ADJ

Description

The BYPP ADJ 230 L/min wetting proportioner injector is a professional tool essential for forest fire fighting and emergency response. Installed upstream of the nozzle, it allows precise injection of wetting agents using a Venturi suction system and adjustable percentages ranging from 0% to 6%, depending on the model.

Designed to optimize firefighting efficiency, it features a rinse position for easy cleaning without disassembly and an integrated non-return valve to prevent water backflow in the suction tube. The injector comes with a plunger tube for immediate installation.
Made from lightweight and durable aluminum alloy, this injector provides precise dosing with settings of 0 / 0.25% / 0.5% / 1% / 3% / 6%, operating at 230 L/min at 7 bars, ensuring reliability and performance in the field.

Key Features:
- Flow rate: 230 L/min at 7 bars
- Adjustable percentage: 0 / 0.25% / 0.5% / 1% / 3% / 6%
- Rinse position for easy cleaning
- Integrated non-return valve
- Plunger tube included
- Material: aluminum alloy
- Weight: 1.6 kg
- Length: 218 mm

Ideal for firefighting professionals and forest protection teams, the BYPP ADJ proportioner injector offers precision, durability, and ease of use, ensuring safe and effective interventions.
