Safety harness HERO PRO BEAL

Description

Suspension harness for work at height and rope access technicians.

The X-shaped design of the shoulder straps makes the Hero Pro harness comfortable and ensures excellent load distribution.

The semi-rigid waistbelt and thigh straps distribute pressure evenly where the body is in contact with the harness, avoiding compression points.

Padded shoulder straps that are kept wide apart reduce friction points around the neck area.

Its honeycomb foam lining the waistband, thighs and shoulder straps enhances harness comfort and helps to limit perspiration.

Technical features :

- 4 metal attachment points (2 side rings, 1 waistband, 1 sternal) fold away to save space.
- 2 opening buckles on each thigh for easy fitting of the harness, even with bulky shoes.
- 2 rings on the shoulder straps for positioning accessories such as a radio.
- 4 large tool holders are positioned around the waistband to keep your equipment ready to hand.

- Identification zone with QR Code available on the back of the belt.

Caractéristiques

- Weight : 2.125 kg en taille M-L
- Composition : Polyamide, Aluminium
- Normes : EN 361, EN 358, EN 813
