Rope loop DYNALOOP

Description

Multifunctional dynamic rope loop ideal for mountaineering and long routes.

It can be used to go along a belay, but also to make a triangulation or to extend an anchor point.

Much stronger than a strap ring, the sheath protects the rope's core from UV rays and friction.
Seams protected by a heat-shrink sheath.

Sizes available:
- 60 cm in yellow (55g)
- 120 cm in blue (105g)
- 150 cm in red (135g)

Caractéristiques

- Resistance : 22kN
