Avalanche probe ARVA SKITRIP 240

Description

The ARVA SKI TRIP 240 probe will enable you to quickly locate a victim buried in a avalanche.

This probe features a 240 cm long, durable aluminum tube with 8 strands, each 30 cm long and 12 mm in diameter.

It features the RACK LOCK system, which enables easy and instantaneous assembly by simply pulling on the locking handle. Tension is provided by a stainless steel cable.

Compact and lightweight, it fits easily into a backpack.

Technical specifications :

- Tough, durable 7001 T6 aluminum tubes
- Probe tensioning via stainless steel cable
- RACK LOCK locking system
- Locking handle
- Conic inserts to easily assemble the tube segments
- Precise depth graduations
- Carrying case with avalanche rescue step-by-step instructions
