Avalanche probe ARVA SPARK 240

### Description

The ARVA SPARK 240 probe enables you to precisely locate victims buried in an avalanche.

This probe features a 240 cm long, durable aluminum tube, divided into 8 segments, each 30 cm long and 12 mm in diameter.

It features the PIN LOCK system, which enables easy, instantaneous assembly by simply pulling on the handle. Tensioning is provided by a stainless steel cable.

Compact and lightweight, it fits easily into a backpack.

Technical specifications :

- Tough, durable 7001 T6 aluminum tubes
- Probe tensioning via stainless steel cable
- PIN LOCK locking system
- Locking handle
- Precise depth graduations
- Pouch with avalanche rescue step-by-step instructions
