Dynamic climbing rope JOKER 9.1mm

### Description

The 9.1 mm diameter JOKER rope is designed for top-level climbers and mountaineers. As a single, double and twin rope, it is ideally suited to a wide range of climbing situations.

This ultra-light, fluid model now benefits from UNICORE technology, a process that glues the rope's core and sheath together without altering its flexibility. So, in the event of the sheath being cut or torn, the core and sheath remain together for added safety.

Technical specifications:

Single use :

- Performance with 80kg
- Impact force: 820daN
- Number of falls: 5
