

PERFORATED SMOKE HOSE SET FOR CUMULUS AND STRATUS

<https://www.securhit.com/en/smoke-simulation/9-access-machines-a-fumee-gaine-perforee-adapateur.html>

Perforated smoke hose set of 10 metres and of 152 mm diameter

Description

The set contains a box with an adapter for fog machines Cumulus and Stratus and a smoke hose with a diameter of 152 mm.

The smoke hose is reinforced in the outer part by wear bands for an optimum resistance when it is dragged.

The extremities of the hose are equipped of sleeves allowing to attach it to a tubular structure.

3 fixation buckles and stowage straps serve to affix securely the hose.

This hose allows to smoke a room by broadcasting the smoke over all its length through holes made for this effect.

Caractéristiques

- Length : 10 mètres
- Diameter : 152 mm
