Inflatable NRBC Decontamination Chamber - Ready in Under 5 Minutes

Description

Ensure safety and personal protection with our inflatable NRBC decontamination chamber, designed for rapid and efficient deployment in emergency situations.

Thanks to its Tubeless one-piece structure, the chamber can be set up in less than 5 minutes, providing a practical and reliable solution for NRBC (Nuclear, Radiological, Biological, Chemical) interventions.

Robust Design and High-Quality Materials

Made from PVC-coated fabric for both the cabin and retention tray, this chamber ensures durability and leak-proof protection even in extreme conditions. The entry and exit points feature a fabric flap attached to the structure, rollable as a curtain, allowing easy access while maintaining the security of the decontamination area.

Individual and Complete Solution

Designed for single-person use, this decontamination chamber is equipped with a sprinkler-type nozzle system distributed across the structure and an internal shower with brush, ensuring thorough and effective decontamination.

Fast and Flexible Inflation

Inflation can be achieved using three options:

- Hand pump (included)
- Air cylinder (not included)
- Electric inflator

Included Accessories

Each kit comes with:

- Transport bag for easy storage and mobility

- Guying kit for stable anchoring
- Repair kit for quick maintenance

Nozzle Options

Nozzles are available in stainless steel or plastic, depending on operational requirements.

Caractéristiques

- Weight of complete kit : 51 kg
- External dimensions : 2.1 x 2.1 x 2.7 m
- Internal dimensions : 1.65 x 1.65 x 2.5 m
