Foam pourer

Description

The FI-VE foam pourer is used to equip low-expansion foam chambers in fire-fighting applications. It attaches directly to the system, allowing foam to be discharged in a targeted manner.

Manufactured in carbon steel, it is also available on request in stainless steel.

Models available:

- FI-VE 3: 3 inch opening/outlet diameter, weight 7kg
- FI-VE 4: 4 inch opening/outlet diameter, weight 11kg
- FI-VE 6: 6 inch opening/outlet diameter, weight 21kg
- FI-VE 8: 8 inch opening/outlet diameter, weight 41kg

On request:

- Stainless steel model
- Stainless steel protection grill

Caractéristiques

- Corps : Acier carbone
- Connection : Bride UNI / ANSI
- Couleur peinture externe : RAL 3000
