Metal spreader cart

Description

The SDC05 metal spreading cart is designed to spread friable sorbents in the event of fuel or hazardous chemical leaks.

Its metal structure contributes to the sturdiness of the unit, and its cover ensures protection of the sorbent against rain.

Technical specifications :

- Easily adjustable flow rate and spreading width (max. 40cm).
- Height-adjustable handle with stop.
- Sliding foot to ensure cart stability during filling.
- Even spreading guaranteed by a paddle feeder.
- Special transmission allows sorbent to be spread only in forward gear. Reverse gear automatically stops spreading.

Caractéristiques

- Dimensions : 620 x 430 x 720 mm
- Weight : 22 kg
- Volume : 65 L
