PRO WATER 11mm semi-static rope

Description

The PRO WATER 11mm rope is a floating semi-static rope ideal for working at height above water (offshore wind turbines, oil rigs, etc.) and whitewater rescue.

Its polyamide and polychloroprene sheath ensures limited shrinkage in water: the rope's flexibility is preserved and knots are easy to tie.

Featuring UNICORE technology, which glues the core and sheath together to prevent them from coming apart in the event of breakage or tearing.

Its bright orange color makes it easily visible in the water, and its buoyancy means it won't get caught in propellers.

Caractéristiques

- Weight : 80g/m
- Diameter : 11mm
- Pourcentage de la gaine : 33%
