ARES AIR safety helmet from Camp

Description

The ARES AIR helmet has been developed to meet the needs of professionals working at height.

Robust and comfortable, its shell is made from a blend of ABS and polycarbonate, with large side holes and a sliding closure system to control ventilation. Its energy-absorbing inner shell is made from high-density EPS foam.

The ARES helmet also features Air Confort System internal padding in thermoformed absorbent material that guarantees comfort and breathability.

Technical features :
- Adjustable straps for greater comfort.
- Polyamide headband, height-adjustable at the front and rear by means of a knob.
For smaller heads, an adapter can be fitted to the front of the helmet to optimise centring.
- Heavy-duty chinstrap (> 50 kg) to prevent accidental release of the helmet.
- Attachments for ear muffs, protective visor and headlamp.

Certifications:
- EN 12492, including requirements for use at very low temperatures (-20°C);
- EN 397 performance requirements for energy absorption and penetration resistance.

Caractéristiques

- Size : 54 - 62 cm
- Poids avec rembourrage frontal : 475 g
- Poids avec rembourrage AIr Comfort System : 505 g
