Camp GT TURBO fall arrest harness

Description

The GT TURBO harness is ideal for complex work at height requiring long rope ascents.

It features the integrated Turbochest belay block, which incorporates a pulley system for unrivalled efficiency during ascent and low wear and tear on the rope and block. The turbochest is easily removable and replaceable.

Technical specifications :

- STS opening buckles mounted on the thighs.
- 5 aluminium alloy attachment rings: ventral for suspension, lateral for support and restraint, sternal and dorsal for fall arrest. Rear textile restraint ring.

Sizes available :
