WING 2 double in-line pulley

Description

Camp's WING 2 pulley is ideal for use on zip lines.

Its special lever locking system ensures a high level of safety: its mechanism prevents accidental opening when under load, and it's also quick and easy to connect to ropes or cables (diameter 10 -12 mm).

Steel ball bearings enable high-speed traverses (maximum speed 72 km/h), and its stainless steel composition guarantees long equipment life.

Thermoplastic protectors prevent clothes and hair from becoming entangled in the equipment, and hold the carabiners of both lanyards in place.

Caractéristiques

- Weight : 347 g
- Material : Acier inoxydable
- Breaking load : 25 kN
- Charge de travail max : 6 kN
