TETHYS compact pulley

Description

The TETHYS pulley is compact and lightweight, designed for mountaineering but also ideal for industrial use, thanks to the possibility of using it with a Prusik self-locking knot that can be installed on both sides.

Designed for rope diameters up to 13mm, it features an attachment hole for two carabiners.
Rotation on self-lubricating bronze bearings: ideal for low-speed use. The efficiency of this pulley is 80%.

Caractéristiques

- Weight : 100 g
- Material : Alliage d'aluminium
- Breaking load : 24 kN
- Certification : CE EN 12278
