Multi-purpose pulley NAIAD Camp

Description

The NAIAD multi-purpose pulley is ideal for reeving and complex, demanding operations involving high loads.

Composed of a main attachment hole for 3 carabiners, two lateral secondary holes and a large lower hole to allow complex maneuvers.

Technical specifications:

- For ropes up to 16 mm.
- Can be used with a Pruski self-locking knot, installed on both sides and both sheaves.
- Rotation on self-lubricating bronze bearings: ideal for low-speed use.
- Efficiency: 90%.
- Aluminum alloy body and sheaves, stainless steel shaft.

Caractéristiques

- Weight : 280 g
- Material : Alliage d'aluminium
- Breaking load : 44 kN
- Norme : CE EN 12278
