NAIAD PRO Pulley

Description

The versatile NAIAD double pulley is ideal for reeving and complex, demanding operations involving high loads.

Consisting of a main attachment hole for 3 carabiners, two lateral secondary holes and a large bottom hole to allow complex maneuvers.

Technical specifications:

- For ropes up to 16 mm.
- Can be used with a Pruski self-locking knot, installed on both sides and both sheaves.
- Ball-bearing rotation: high efficiency for intensive, high-speed use.
- Efficiency: 97%.
- Aluminium alloy body and sheaves, stainless steel shaft.

Caractéristiques

- Weight : 300 g
- Material : Alliage d'aluminium
- Breaking load : 46 kN
- Norme : CE EN 12278
