Portable safety shower with eye wash station

### Description

This portable safety shower combines the functions of an eye wash station and a body safety shower.

This device is designed for workstations where employees are exposed to the risk of contamination or splashing of hazardous, corrosive, irritating or toxic products in the eyes or on the body.

The shower is equipped with a hand shower with flexible hose and a soft rubber eye cup with dust cap to perform hygienic and effective eye washing.

Technical features :

- 18-liter portable tank, including 15 liters of drinking water.
- 1.5 m hose length.
- Equipped with pressure gauge and safety vent valve in case of overpressure.
- Water flow rate 6L/min.

### Caractéristiques

- Weight : 0.8 kg
- Size : 74 cm
