PRO FORCE 8.6mm Longlife dynamic rope

Description

Lightweight and fluid, the PROFORCE 8.6mm dynamic double rope is designed for ascents of major routes, cliffs and icefalls.

Technical and robust to support the most difficult efforts, it has a low impact force and a high number of falls.

It benefits from Longlife technology, which improves fluidity and flexibility and protects it from dust and dirt.

The optional Acqua Stop' treatment with a hydrophobic chemical compound of each sheath thread at high temperature before rope manufacture prevents it from becoming water-laden and increases its resistance to abrasion.

Technical specifications:

- Weight: 46.5g/m
- Percentage of sheath: 40%.
- Number of falls: 9
- Impact force: 540 daN
- Dynamic elongation: 31.7
- Static elongation: 10%.
- Breaking strength: 1515 daN

Caractéristiques

- Diameter : 8.6 mm
- Material : Polyamide
- Certification : CE 89/686/CEE - EN 892 - UIAA
